Crawley Borough Council

Report to Overview and Scrutiny Commission 6 February 2017

2

Report to Cabinet 8 February 2017

Treasury Management Strategy 2017/2018

Report of the Head of Finance, Revenues and Benefits, FIN/404

1. Purpose

1.1 The Strategy for 2017/18 covers two main areas:

Capital Issues

- the capital plans and the prudential indicators;
- the minimum revenue provision (MRP) policy.

Treasury Management Issues

- the current treasury position;
- treasury indicators which limit the treasury risk and activities of the Council;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- debt rescheduling;
- the investment strategy;
- creditworthiness policy; and
- policy on use of external service providers.
- 1.2 In respect of non-Housing Revenue Account activities, the Council's current policy is to remain debt free and invest according to the principles of security, liquidity and yield.
- 1.3 There are no material changes to the Investment Strategy in section 7 and Appendix 3 compared with the 2016/2017 Strategy, as amended by the 2016/2017 <u>Treasury Management Mid-Year Review</u>.

2. Recommendations

2.1 To the Overview and Scrutiny Commission:

That the Commission considers the report and decides what comments, if any, it wishes to submit to the Cabinet.

2.2 To the Cabinet

The Cabinet is requested to recommend to Council the approval of:-

- a) the Treasury Prudential Indicators and the Minimum Revenue Provision (MRP) Statement contained within Section 5;
- b) the Treasury Management Strategy contained within Section 6;
- c) the Investment Strategy contained within Section 7, and the detailed criteria included in Appendix 3;

3. Reasons for the Recommendations

3.1 The Council's financial regulations, in accordance with the CIPFA Code of Practice for Treasury Management, requires a Treasury Management Strategy to be approved for the forthcoming financial year. This report complies with these requirements.

4. Background

- 4.1 The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low risk counterparties or instruments commensurate with the Council's low risk appetite, providing adequate liquidity initially before considering investment return.
- 4.2 The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer term cash flow planning to ensure that the Council can meet its capital spending obligations. This management of longer term cash may involve arranging long or short term loans, or using longer term cash flow surpluses. On occasion any debt previously drawn may be restructured to meet Council risk or cost objectives.
- 4.3 CIPFA defines treasury management as:

"The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

4.3 This report takes into account the revenue and capital implications arising in the 2017/18 Budget and Council Tax report (FIN/401). This report excludes any implications of the Town Hall report elsewhere on this agenda, the implications of this report will be reported in a future Treasury Management report.

5. The Capital Prudential Indicators 2017/18 – 2019/20

5.1 The Capital Expenditure Plans

- 5.1.1 The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.
- 5.1.2 **Capital expenditure.** This prudential indicator is a summary of the Council's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle. Members are asked to approve the capital expenditure forecasts:

| Capital Expenditure £'000 | 2015/16 Actual | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|---------------------------|-------------------|---------------------|---------------------|---------------------|---------------------|
| Cabinet | 757 | 2,033 | 3,149 | 2,971 | |
| Resources | 368 | 637 | 237 | | |
| Environment Services & | 1,761 | 1,349 | 2,036 | 1,497 | 94 |
| Sustainability | | | | | |
| Planning & Economic | 16 | 7,899 | 5,000 | 1,700 | |
| Development | | | | | |
| Public Protection & | 42 | 89 | 50 | 70 | |
| Community Engagement | | | | | |
| Housing Services | 2,314 | 1,022 | 881 | 1,996 | |
| Wellbeing | 2,948 | 3,168 | 2,548 | 272 | |
| General Fund | 8,206 | 16,197 | 13,901 | 8,506 | 94 |
| HRA | 20,788 | 14,707 | 37,468 | 39,467 | 25,932 |
| Total | 28,994 | 30,904 | 51,369 | 47,973 | 26,026 |

5.1.3 The table below summarises the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

| Capital Expenditure £'000 | 2015/16 Actual | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|---------------------------|-------------------|---------------------|---------------------|---------------------|---------------------|
| General Fund | 8,206 | 16,197 | 13,901 | 8,506 | 94 |
| HRA | 20,788 | 14,707 | 37,468 | 39,467 | 25,932 |
| Total | 28,994 | 30,904 | 51,369 | 47,973 | 26,026 |
| Financed by: | | | | | |
| Capital receipts | 3,309 | 4,919 | 12,551 | 8,419 | |
| Capital reserves | 198 | 7,899 | | | |
| 1-4-1 receipts | 3,160 | 1,339 | 5,217 | 8,773 | 4,531 |
| Replacement funds | 728 | 453 | 23 | 87 | |
| Capital grants | 2,732 | 2,695 | 1,327 | | 94 |
| Major Repairs Reserve | 18,482 | 13,599 | 32,251 | 30,694 | 21,401 |
| Net financing need for | | | | | |
| the year | 385 | 0 | 0 | 0 | 0 |

- 5.2 The Council's borrowing need (the Capital Financing Requirement).
- 5.2.1 The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's underlying borrowing need. Any capital expenditure above, which has not immediately been paid for, will increase the CFR.
- 5.2.2 The Council is asked to approve the CFR projections below:

| £'000 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 | | | |
|-------------------------------|---------|----------|----------|----------|----------|--|--|--|
| | Actual | Estimate | Estimate | Estimate | Estimate | | | |
| Capital Financing Requirement | | | | | | | | |
| CFR – General Fund | 0 | 0 | 0 | 0 | 0 | | | |
| CFR - HRA | 260,325 | 260,325 | 260,325 | 260,325 | 260,325 | | | |
| Total CFR | 260,325 | 260,325 | 260,325 | 260,325 | 260,325 | | | |
| Movement in CFR | 385 | 0 | 0 | 0 | 0 | | | |

| Movement in CFR represented by | | | | | | |
|--------------------------------|-----|---|---|---|---|--|
| Net financing need for | | | | | | |
| the year (above) | 0 | 0 | 0 | 0 | 0 | |
| Less MRP/VRP and | | | | | | |
| other financing | | | | | | |
| movements | 385 | 0 | 0 | 0 | 0 | |
| Movement in CFR | 385 | 0 | 0 | 0 | 0 | |

5.2.3 The large CFR on the HRA is due to the self-financing settlement in 2011/12.

5.3 Minimum revenue provision (MRP) policy statement

- 5.3.1 The Council is required to pay off an element of the accumulated General Fund capital spend each year (the CFR) through a revenue charge (the minimum revenue provision MRP), although it is also allowed to undertake additional voluntary payments if required (voluntary revenue provision VRP).
- 5.3.2 Government regulations have been issued which require the full Council to approve an MRP Statement in advance of each year. A variety of options are provided to councils, so long as there is a prudent provision. The Council is recommended to approve the following MRP Statement:
- 5.3.3 For capital expenditure incurred before 1 April 2008 or which in the future will be Supported Capital Expenditure, the MRP policy will be:
 - Existing practice MRP will follow the existing practice outlined in former CLG regulations (option 1)

This option provides for an approximate 4% reduction in the borrowing need (CFR) each year.

- 5.3.4 From 1 April 2008 for all unsupported borrowing (including PFI and finance leases) the MRP policy will be:
 - Asset life method MRP will be based on the estimated life of the assets, in accordance with the regulations (this option must be applied for any expenditure capitalised under a Capitalisation Direction) (option 3)

This option provides for a reduction in the borrowing need over approximately the asset's life.

5.3.5 There is no requirement on the HRA to make a minimum revenue provision but there is a requirement for a charge for depreciation to be made (although there are transitional arrangements in place).

5.4 Core funds and expected investment balances

5.4.1 The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.). Detailed below are estimates of the year end balances for each resource and anticipated day to day cash flow balances.

| Year End Resources £'000 | 2015/16 Actual | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|--------------------------|-------------------|---------------------|---------------------|---------------------|---------------------|
| Fund balances / | | | | | |
| reserves | 58,108 | 54,982 | 42,031 | 30,637 | 28,536 |
| Capital receipts* | 39,689 | 41,347 | 31,079 | 20,887 | 20,856 |
| Total core funds | 97,797 | 96,329 | 73,110 | 51,524 | 49,392 |
| Working capital | 20,166 | 11,730 | 10,000 | 10,000 | 10,000 |
| Under/over borrowing | 0 | 0 | 0 | 0 | 0 |
| Expected investments | 117,963 | 108,059 | 83,110 | 62,524 | 59,392 |

^{*} includes 1-4-1 receipts

5.5 Affordability prudential indicators

- 5.5.1 The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators:
- 5.5.2 Ratio of financing costs to net revenue stream. This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream.

| % | | | 2019/20 |
|--------------|----------|----------|----------|
| | Estimate | Estimate | Estimate |
| General Fund | -4.51% | -3.97% | -5.27% |
| HRA | 17.59% | 17.36% | 17.26% |

The estimates of financing costs include current commitments and the proposals in this budget report.

5.5.3 Incremental impact of capital investment decisions on council tax. This indicator identifies the revenue costs associated with proposed changes to the three year capital programme recommended in this budget report compared to the Council's existing approved commitments and current plans. The assumptions are based on the budget, but will invariably include some estimates, such as the level of Government support, which are not published over a three year period.

| £ | 2017/18 | 2018/19 | 2019/20 |
|----------------------|----------|----------|----------|
| | Estimate | Estimate | Estimate |
| Council tax - band D | nil | nil | nil |

5.5.4 Estimates of the incremental impact of capital investment decisions on housing rent levels. Similar to the council tax calculation, this indicator identifies the trend in the cost of proposed changes in the housing capital programme recommended in this budget report compared to the Council's existing commitments and current plans, expressed as a discrete impact on weekly rent levels.

| £ | | 2018/19 Estimate | 2019/20 Estimate |
|---------------------|-----|---------------------|---------------------|
| Weekly housing rent | | | |
| levels | nil | nil | nil |

This indicator shows the revenue impact on any newly proposed changes, although any discrete impact will be constrained by rent controls.

5.5.5 HRA ratios

| | 2015/16 Actual | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|---------------|-------------------|---------------------|---------------------|---------------------|---------------------|
| HRA debt | | | | | |
| £'000 | 260,325 | 260,325 | 260,325 | 260,325 | 260,325 |
| HRA revenues | | | | | |
| £'000 | 48,571 | 47,651 | 46,900 | 47,747 | 48,052 |
| Ratio of debt | | | | | |
| to revenues % | 536 | 546 | 555 | 545 | 542 |

| | 2015/16 Actual | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|---------------|-------------------|---------------------|---------------------|---------------------|---------------------|
| HRA debt | | | | | |
| £'000 | 260,325 | 260,325 | 260,325 | 260,325 | 260,325 |
| Number of | | | | | |
| HRA dwellings | 7,854 | 7,840 | 7,866 | 8,073 | 8,078 |
| Debt per | | | | | |
| dwelling £ | 33,145 | 33,205 | 33,095 | 32,246 | 32,226 |

6. Borrowing

6.1 The capital expenditure plans set out in Section 5 provide details of the service activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions and the annual investment strategy.

6.2 Current portfolio position

6.2.1 The Council's treasury portfolio position at 31 March 2016, with forward projections are summarised below. The table shows the actual external debt (the treasury management operations), against the underlying capital borrowing need (the Capital Financing Requirement - CFR), highlighting any over or under borrowing.

| £'000 | 2015/16 Actual | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|--------------------------|-------------------|---------------------|---------------------|---------------------|---------------------|
| External Debt | | | | | |
| Debt at 1 April | 260,325 | 260,325 | 260,325 | 260,325 | 260,325 |
| Expected change in | | | | | |
| Debt | 0 | 0 | 0 | 0 | 0 |
| Other long-term | | | | | |
| liabilities (OLTL) | 0 | 0 | 0 | 0 | 0 |
| Expected change in | | | | | |
| OLTL | 0 | 0 | 0 | 0 | 0 |
| Actual debt at 31 | | | | | |
| March (A) | 260,325 | 260,325 | 260,325 | 260,325 | 260,325 |
| The Capital Financing | | | | | |
| Requirement | 260,325 | 260,325 | 260,325 | 260,325 | 260,325 |
| Under / (over) borrowing | 0 | 0 | 0 | 0 | 0 |

6.2.2 Within the prudential indicators there are a number of key indicators to ensure that the Council operates its activities within well defined limits. One of these is that the

Council needs to ensure that its gross debt does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2017/18 and the following two financial years. This allows some flexibility for limited early borrowing for future years, but ensures that borrowing is not undertaken for revenue purposes.

- 6.2.3 The Head of Finance, Revenues and Benefits reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.
- 6.3 Treasury Indicators: Limits to Borrowing Activity
- 6.3.1 **The Operational Boundary.** This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt.

| Operational boundary £'000 | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|-----------------------------|---------------------|---------------------|---------------------|---------------------|
| Debt | 260,325 | 260,325 | 260,325 | 260,325 |
| Other long term liabilities | 0 | 0 | 0 | 0 |
| Total | 260,325 | 260,325 | 260,325 | 260,325 |

- 6.3.2 **The Authorised Limit for external debt.** A further key prudential indicator represents a control on the maximum level of borrowing. This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.
- 6.3.3 This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all Councils' plans, or those of a specific council, although this power has not yet been exercised.
- 6.3.4 The Council is asked to approve the following Authorised Limit:

| Authorised limit £'000 | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|-----------------------------|---------------------|---------------------|---------------------|---------------------|
| Debt | 270,325 | 270,325 | 270,325 | 270,325 |
| Other long term liabilities | 0 | 0 | 0 | 0 |
| Total | 270,325 | 270,325 | 270,325 | 270,325 |

6.3.5 Separately, the Council is also limited to a maximum HRA CFR through the HRA self-financing regime. This limit is currently:

| HRA Debt Limit £'000 | 2016/17 Estimate | 2017/18 Estimate | 2018/19 Estimate | 2019/20 Estimate |
|----------------------|---------------------|---------------------|---------------------|---------------------|
| HRA debt cap | 263,902 | 263,902 | 263,902 | 263,902 |
| HRA CFR | 260,325 | 260,325 | 260,325 | 260,325 |
| HRA headroom | 3,577 | 3,577 | 3,577 | 3,577 |

6.4 Prospects for Interest Rates

6.4.1 The Council has appointed Capita Asset Services as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. The following table gives Capita's central view.

| | Dec-16 | Mar-17 | Jun-17 | Sep-17 | Dec-17 | Mar-18 | Jun-18 | Sep-18 | Dec-18 | Mar-19 | Jun-19 | Sep-19 | Dec-19 | Mar-20 |
|----------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
| Bank rate | 0.25% | 0.25% | 0.25% | 0.25% | 0.25% | 0.25% | 0.25% | 0.25% | 0.25% | 0.25% | 0.50% | 0.50% | 0.75% | 0.75% |
| 5yr PWLB rate | 1.60% | 1.60% | 1.60% | 1.60% | 1.60% | 1.70% | 1.70% | 1.70% | 1.80% | 1.80% | 1.90% | 1.90% | 2.00% | 2.00% |
| 10yr PWLB rate | 2.30% | 2.30% | 2.30% | 2.30% | 2.30% | 2.30% | 2.40% | 2.40% | 2.40% | 2.50% | 2.50% | 2.60% | 2.60% | 2.70% |
| 25yr PWLB rate | 2.90% | 2.90% | 2.90% | 2.90% | 3.00% | 3.00% | 3.00% | 3.10% | 3.10% | 3.20% | 3.20% | 3.30% | 3.30% | 3.40% |
| 50yr PWLB rate | 2.70% | 2.70% | 2.70% | 2.70% | 2.80% | 2.80% | 2.80% | 2.90% | 2.90% | 3.00% | 3.00% | 3.10% | 3.10% | 3.20% |

- 6.4.2 Investment returns are likely to remain relatively low during 2017/18 and beyond.
- 6.4.3 There will remain a cost of carry to any new borrowing which causes an increase in investments as this will incur a revenue loss between borrowing costs and investment returns.

6.5 Borrowing Strategy

6.5.1 The Council borrowed £260.325m in 2011/12 for the HRA self-financing settlement. The General Fund remains debt free, and this position is not expected to change during 2017/18.

6.5.2 Treasury management limits on activity

There are three debt related treasury activity limits. The purpose of these are to restrain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest rates. However, if these are set to be too restrictive they will impair the opportunities to reduce costs / improve performance. The indicators are:

- Upper limits on variable interest rate exposure. This identifies a maximum limit for variable interest rates based upon the debt position net of investments;
- Upper limits on fixed interest rate exposure. This is similar to the previous indicator and covers a maximum limit on fixed interest rates:
- Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large fixed rate sums falling due for refinancing, and are required for upper and lower limits.
- 6.5.3 The Council is asked to approve the following treasury indicators and limits:

| £'000 | 2017/18 | 2018/19 | 2019/20 | | | | | |
|---------------------------------|---------|---------|---------|--|--|--|--|--|
| Interest rate Exposures | | | | | | | | |
| | Upper | Upper | Upper | | | | | |
| Limits on fixed interest | | | | | | | | |
| rates: | | | | | | | | |
| Debt only | 270,325 | 270,325 | 270,325 | | | | | |
| Investments | 140,000 | 140,000 | 140,000 | | | | | |
| only | | | | | | | | |
| Limits on variable interest | | | | | | | | |
| rates | | | | | | | | |
| Debt only | 10,000 | 10,000 | 10,000 | | | | | |
| Investments | 40,000 | 40,000 | 40,000 | | | | | |
| only | | | | | | | | |

| Maturity Structure of fixed interest rate borrowing 2017/18 | | | | | | |
|---|-------|-------|--|--|--|--|
| | Lower | Upper | | | | |
| Under 12 months | 0% | 10% | | | | |
| 12 months to 2 years | 0% | 10% | | | | |
| 2 years to 5 years | 0% | 10% | | | | |
| 5 years to 10 years | 0% | 30% | | | | |
| 10 years to 20 years | 0% | 80% | | | | |
| 20 years to 30 years | 0% | 15% | | | | |
| 30 years to 40 years | 0% | 10% | | | | |
| 40 years to 50 years | 0% | 10% | | | | |

6.6 Policy on borrowing in advance of need

- 6.6.1 The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.
- 6.6.2 Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

6.7 Debt rescheduling

- 6.7.1 As short term borrowing rates will be considerably cheaper than longer term fixed interest rates, there may be potential opportunities to generate savings by switching from long term debt to short term debt. However, these savings will need to be considered in the light of the current treasury position and the size of the cost of debt repayment (premiums incurred).
- 6.7.2 The reasons for any rescheduling to take place will include:
 - the generation of cash savings and / or discounted cash flow savings;
 - helping to fulfil the treasury strategy;
 - enhance the balance of the portfolio (amend the maturity profile and/or the balance of volatility).
- 6.7.3 Consideration will also be given to identify if there is any residual potential for making savings by running down investment balances to repay debt prematurely as short term rates on investments are likely to be lower than rates paid on current debt.
- 6.7.4 All rescheduling will be reported to the Cabinet, at the earliest meeting following its action.

7. Annual Investment Strategy

7.1 Investment Policy

- 7.1.1 The Council's investment policy has regard to the Government's Guidance on Local Government Investments ("the Guidance") and the revised CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes ("the CIPFA TM Code"). The Council's investment priorities will be security first, liquidity second and then return.
- 7.1.2 In accordance with the above guidance from the Government and CIPFA, and in order to minimise the risk to investments, the Council applies minimum acceptable credit

- criteria in order to generate a list of highly creditworthy counterparties which also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the Short Term and Long Term ratings.
- 7.1.3 Ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To this end the Council will engage with its advisors to maintain a monitor on market pricing such as "credit default swaps" and overlay that information on top of the credit ratings.
- 7.1.4 Other information sources used will include the financial press, share price and other such information pertaining to the banking sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.
- 7.1.5 Investment instruments identified for use in the financial year are listed in Appendix 3 under the 'specified' and 'non-specified' investments categories. Counterparty limits will be as set through the Council's treasury management practices schedules.

7.2 Creditworthiness policy

- 7.2.1 This Council applies the creditworthiness service provided by Capita Asset Services. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies Fitch, Moody's and Standard and Poor's. The credit ratings of counterparties are supplemented with the following overlays:
 - credit watches and credit outlooks from credit rating agencies;
 - CDS spreads to give early warning of likely changes in credit ratings;
 - sovereign ratings to select counterparties from only the most creditworthy countries.
- 7.2.2 This modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads for which the end product is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the Council to determine the suggested duration for investments. The Council will therefore use counterparties within the following durational bands:
 - Yellow 5 years *
 - Dark pink 5 years for Enhanced money market funds (EMMFs) with a credit score of 1.25
 - Light pink 5 years for Enhanced money market funds (EMMFs) with a credit score of 1.5
 - Purple 2 years
 - Blue 1 year (only applies to nationalised or semi nationalised UK Banks)
 - Orange 1 yearRed 6 monthsGreen 100 days
 - No colour not to be used

| | Colour (and long term rating where applicable) | Money Limit | Time Limit |
|--|---|----------------|---------------|
| Banks * | yellow | unlimited | 5 yrs |
| Banks | purple | £15m | 2 yrs |
| Banks – part nationalised | blue | £15m | 1 yr |
| Banks | orange | £10m | 1 yr |
| Banks | red | £10m | 6 mths |
| Banks | green | £10m | 100 days |
| Banks | No colour | Not to be used | |
| Limit 3 category – Council's banker (not meeting Banks 1) | n/a | £1m | 1 day |
| Corporate Bonds | AA- A- | £5m £2m | 2 yrs 1 yr |
| Repurchase agreements | AA | £5m | 5 yrs |
| DMADF | AAA | unlimited | 6 months |
| Local authorities | n/a | £15m | 5 yrs |
| Housing Associations | AA- | £2m | 1 yr |
| Money market funds | AAA | £15m | liquid |
| Enhanced money market funds with a credit score of 1.25 | Dark pink / AAA | £10m | liquid |
| Enhanced money market funds with a credit score of 1.5 | Light pink / AAA | £10m | liquid |

^{*} Please note: the yellow colour category is for UK Government debt, or its equivalent, constant NAV money market funds and collateralised deposits where the collateral is UK Government debt.

- 7.2.3 Capita's creditworthiness service uses a wider array of information than just primary ratings and by using a risk weighted scoring system, does not give undue preponderance to just one agency's ratings.
- 7.2.4 Typically the minimum credit ratings criteria the Council use will be a short term rating (Fitch or equivalents) of short term rating F1, long term rating A-. There may be occasions when the counterparty ratings from one rating agency are marginally lower than these ratings but may still be used. In these instances consideration will be given to the whole range of ratings available, or other topical market information, to support their use.
- 7.2.5 All credit ratings will be monitored daily. The Council is alerted to changes to ratings of all three agencies through its use of Capita's creditworthiness service.
 - if a downgrade results in the counterparty / investment scheme no longer meeting the Council's minimum criteria, its further use as a new investment will be withdrawn immediately.
 - in addition to the use of credit ratings the Council will be advised of information in movements in credit default swap spreads against the iTraxx benchmark and other market data on a weekly basis. Extreme market movements may result in downgrade of an institution or removal from the Council's lending list.

7.2.6 Sole reliance will not be placed on the use of this external service. In addition this Council will also use market data and market information, information on any external support for banks to help support its decision making process.

7.3 Ethical Investment Policy

- 7.3.1 The Council will not undertake direct investment or borrowing activities with organisations whose core activities include:
 - Armaments weapon systems
 - Gambling
 - Pornography
 - Tobacco
 - Pay-day loans
- 7.3.2 In order to comply with treasury management guidance, the Council's investments will prioritise security, liquidity and yield in that order. The Ethical Investment Policy thereby becomes a fourth consideration in the decision making process.
- 7.3.3 The core activities in the Ethical Investment Policy above has been chosen after careful consideration of the Policy direction of the administration, the officer time in implementing the policy, the cost of external resources, and the timeliness of investment decisions.

7.4 Country limits

7.4.1 The Council has determined that it will only use approved counterparties from countries with a minimum sovereign credit rating of AA- from Fitch (or equivalent). The list of countries that qualify using this credit criteria as at the date of this report are shown in Appendix 4. This list will be added to, or deducted from, by officers should ratings change in accordance with this policy.

7.5 Investment strategy

- 7.5.1 **In-house funds.** Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e. rates for investments up to 12 months).
- 7.5.2 **Investment returns expectations.** Bank Rate is forecast to stay flat at 0.25% until quarter 2 2019 and not rise above 0.75% by quarter 1 2020. Bank Rate forecasts for financial year ends (March) are:
 - 2016/17 0.25%
 - 2017/18 0.25%
 - 2018/19 0.25%
 - 2019/20 0.50%
- 7.5.3 The suggested budgeted investment earnings rates for returns on investments placed for periods up to 100 days during each financial year are as follows:

| 2017/18 | 0.25% |
|-------------|-------|
| 2018/19 | 0.25% |
| 2019/20 | 0.50% |
| 2020/21 | 0.75% |
| 2021/22 | 1.00% |
| 2022/23 | 1.50% |
| 2023/24 | 1.75% |
| Later years | 2.75% |

- 7.5.4 The overall balance of risks to these forecasts is currently probably slightly skewed to the downside in view of the uncertainty over the final terms of Brexit. If growth expectations disappoint and inflationary pressures are minimal, the start of increases in Bank Rate could be pushed back. On the other hand, should the pace of growth quicken and / or forecasts for increases in inflation rise, there could be an upside risk i.e. Bank Rate increases occur earlier and / or at a quicker pace.
- 7.5.5 **Investment treasury indicator and limit** total principal funds invested for greater than 364 days. These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment, and are based on the availability of funds after each year-end.

The Council is asked to approve the treasury indicator and limit: -

| Maximum principal sums invested > 364 days | | | | | | | |
|--|---------|---------|---------|--|--|--|--|
| £m | 2017/18 | 2018/19 | 2019/20 | | | | |
| Principal sums invested > | | | | | | | |
| 364 days | £50m | £50m | £50m | | | | |

- 7.5.6 **Investment Risk Benchmarking**. These benchmarks are simple guides to maximum risk, so they may be breached from time to time, depending on movements in interest rates and counterparty criteria. The purpose of the benchmark is that officers will monitor the current and trend position and amend the operational strategy to manage risk as conditions change. Any breach of the benchmarks will be reported, with supporting reasons in the Mid-Year or Annual Report.
- 7.5.7 Security The Council's maximum security risk benchmark for the current portfolio, when compared to these historic default tables, is:
 - 0.15% historic risk of default when compared to the whole portfolio.
- 7.5.8 Liquidity in respect of this area the Council seeks to maintain:
 - Bank overdraft £0.1m
 - Liquid short term deposits of at least £2m available with a week's notice.
 - Weighted Average Life benchmark is expected to be 0.7 years, with a maximum of 1.20 years.
- 7.5.9 Yield local measures of yield benchmarks are:
 - Investments internal returns 0.2% above the 7 day LIBID rate
- 7.5.10 And in addition that the security benchmark for each individual year is:

| | 1 year | 2 years | 3 years | 4 years | 5 years |
|---------|--------|---------|---------|---------|---------|
| Maximum | 0.03% | 0.22% | 0.40% | 0.56% | 0.74% |

Note: This benchmark is an average risk of default measure, and would not constitute an expectation of loss against a particular investment.

7.5.11 A the end of the financial year, the Council will report on its investment activity as part of its Annual Treasury Report.

7.6 Treasury management consultants

- 7.6.1 The Council uses Capita Asset Services, Treasury solutions as its external treasury management advisors.
- 7.6.2 The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon external service providers.

7.6.3 It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented, and subjected to regular review.

8. Implications

8.1 There are no significant legal implications as a result of the recommendations in this report. Compliance with the CIPFA Code of Practice for Treasury Management in the public services, the Local Government Investment Guidance provides that the council's investments are and will continue to be, within its legal powers conferred under the Local Government Act 2003.

<u>UK.</u> **GDP growth rates** in 2013, 2014 and 2015 of 2.2%, 2.9% and 1.8% were some of the strongest rates among the G7 countries. Growth is expected to have strengthened in 2016 with the first three quarters coming in respectively at +0.4%, +0.7% and +0.5%. The latest Bank of England forecast for growth in 2016 as a whole is +2.2%. The figure for quarter 3 was a pleasant surprise which confounded the downbeat forecast by the Bank of England in August of only +0.1%, (subsequently revised up in September, but only to +0.2%). During most of 2015 and the first half of 2016, the economy had faced headwinds for exporters from the appreciation of sterling against the Euro, and weak growth in the EU, China and emerging markets, and from the dampening effect of the Government's continuing austerity programme.

The **referendum vote for Brexit** in June 2016 delivered an immediate shock fall in confidence indicators and business surveys at the beginning of August, which were interpreted by the Bank of England in its August Inflation Report as pointing to an impending sharp slowdown in the economy. However, the following monthly surveys in September showed an equally sharp recovery in confidence and business surveys so that it is generally expected that the economy will post reasonably strong growth numbers through the second half of 2016 and also in 2017, albeit at a slower pace than in the first half of 2016.

The Monetary Policy Committee, (MPC), meeting of 4th August was therefore dominated by countering this expected sharp slowdown and resulted in a package of measures that included a cut in Bank Rate from 0.50% to 0.25%, a renewal of quantitative easing, with £70bn made available for purchases of gilts and corporate bonds, and a £100bn tranche of cheap borrowing being made available for banks to use to lend to businesses and individuals.

The MPC meeting of 3 November left Bank Rate unchanged at 0.25% and other monetary policy measures also remained unchanged. This was in line with market expectations, but a major change from the previous quarterly Inflation Report MPC meeting of 4 August, which had given a strong steer, in its forward guidance, that it was likely to cut Bank Rate again, probably by the end of the year if economic data turned out as forecast by the Bank. The MPC meeting of 15 December also left Bank Rate and other measures unchanged.

The latest MPC decision included a forward view that **Bank Rate** could go either <u>up or down</u> depending on how economic data evolves in the coming months. Our central view remains that Bank Rate will remain unchanged at 0.25% until the first increase to 0.50% in quarter 2 2019 (unchanged from our previous forecast). However, we would not, as yet, discount the risk of a cut in Bank Rate if economic growth were to take a significant dip downwards, though we think this is unlikely. We would also point out that forecasting as far ahead as mid 2019 is highly fraught as there are many potential economic headwinds which could blow the UK economy one way or the other as well as political developments in the UK, (especially over the terms of Brexit), EU, US and beyond, which could have a major impact on our forecasts.

The pace of Bank Rate increases in our forecasts has been slightly increased beyond the three year time horizon to reflect higher inflation expectations.

The August quarterly Inflation Report was based on a pessimistic forecast of near to zero GDP growth in quarter 3 i.e. a sharp slowdown in growth from +0.7% in quarter 2, in reaction to the shock of the result of the referendum in June. However, **consumers** have very much stayed in a 'business as usual' mode and there has been no sharp downturn in spending; it is consumer expenditure that underpins the services sector which comprises about 75% of UK GDP. After a fairly flat three months leading up to October, retail sales in October surged at the strongest rate since September 2015 and were again strong in

November. In addition, the GfK consumer confidence index recovered quite strongly to -3 in October after an initial sharp plunge in July to -12 in reaction to the referendum result. However, in November it fell to -8 indicating a return to pessimism about future prospects among consumers, probably based mainly around concerns about rising inflation eroding purchasing power.

Bank of England GDP forecasts in the November quarterly Inflation Report were as follows, (August forecasts in brackets) - 2016 +2.2%, (+2.0%); 2017 1.4%, (+0.8%); 2018 +1.5%, (+1.8%). There has, therefore, been a sharp increase in the forecast for 2017, a marginal increase in 2016 and a small decline in growth, now being delayed until 2018, as a result of the impact of Brexit.

Capital Economics' GDP forecasts are as follows: 2016 +2.0%; 2017 +1.5%; 2018 +2.5%. They feel that pessimism is still being overdone by the Bank and Brexit will not have as big an effect as initially feared by some commentators.

The Chancellor has said he will do 'whatever is needed' i.e. to promote growth; there are two main options he can follow – fiscal policy e.g. cut taxes, increase investment allowances for businesses, and/or increase government expenditure on infrastructure, housing etc. This will mean that the PSBR deficit elimination timetable will need to slip further into the future as promoting growth, (and ultimately boosting tax revenues in the longer term), will be a more urgent priority. The Governor of the Bank of England, Mark Carney, had warned that a vote for Brexit would be likely to cause a slowing in growth, particularly from a reduction in business investment, due to the uncertainty of whether the UK would have continuing full access, (i.e. without tariffs), to the EU single market. He also warned that the Bank could not do all the heavy lifting to boost economic growth and suggested that the Government would need to help growth e.g. by increasing investment expenditure and by using fiscal policy tools. The newly appointed Chancellor, Phillip Hammond, announced, in the aftermath of the referendum result and the formation of a new Conservative cabinet, that the target of achieving a budget surplus in 2020 would be eased in the Autumn Statement on 23 November. This was duly confirmed in the Statement which also included some increases in infrastructure spending.

The other key factor in forecasts for Bank Rate is **inflation** where the MPC aims for a target for CPI of 2.0%. The November Inflation Report included an increase in the peak forecast for inflation from 2.3% to 2.7% during 2017; (Capital Economics are forecasting a peak of 3.2% in 2018). This increase was largely due to the effect of the sharp fall in the value of sterling since the referendum, although during November, sterling has recovered some of this fall to end up 15% down against the dollar, and 8% down against the euro (as at the MPC meeting date – 15.12.16). This depreciation will feed through into a sharp increase in the cost of imports and materials used in production in the UK. However, the MPC is expected to look through the acceleration in inflation caused by external, (outside of the UK), influences, although it has given a clear warning that if wage inflation were to rise significantly as a result of these cost pressures on consumers, then they would take action to raise Bank Rate.

What is clear is that **consumer disposable income** will come under pressure, as the latest employers' survey is forecasting median pay rises for the year ahead of only 1.1% at a time when inflation will be rising significantly higher than this. The CPI figure has been on an upward trend in 2016 and reached 1.2% in November. However, prices paid by factories for inputs rose to 13.2% though producer output prices were still lagging behind at 2.3% and core inflation was 1.4%, confirming the likely future upwards path.

Gilt yields, and consequently PWLB rates, have risen sharply since hitting a low point in mid-August. There has also been huge volatility during 2016 as a whole. The year started with 10 year gilt yields at 1.88%, fell to a low point of 0.53% on 12 August, and hit a new peak on the way up again of 1.55% on 15 November. The rebound since August reflects

the initial combination of the yield-depressing effect of the MPC's new round of quantitative easing on 4 August, together with expectations of a sharp downturn in expectations for growth and inflation as per the pessimistic Bank of England Inflation Report forecast, followed by a sharp rise in growth expectations since August when subsequent business surveys, and GDP growth in quarter 3 at +0.5% q/q, confounded the pessimism. Inflation expectations also rose sharply as a result of the continuing fall in the value of sterling.

Employment had been growing steadily during 2016 but encountered a first fall in over a year, of 6,000, over the three months to October. The latest employment data in December, (for November), was distinctly weak with an increase in unemployment benefits claimants of 2,400 in November and of 13,300 in October. **House prices** have been rising during 2016 at a modest pace but the pace of increase has slowed since the referendum; a downturn in prices could dampen consumer confidence and expenditure.

USA. The American economy had a patchy 2015 with sharp swings in the quarterly **growth rate** leaving the overall growth for the year at 2.4%. Quarter 1 of 2016 at +0.8%, (on an annualised basis), and quarter 2 at 1.4% left average growth for the first half at a weak 1.1%. However, quarter 3 at 3.2% signalled a rebound to strong growth. The Fed. embarked on its long anticipated first increase in rates at its December 2015 meeting. At that point, confidence was high that there would then be four more increases to come in 2016. Since then, more downbeat news on the international scene and then the Brexit vote, have caused a delay in the timing of the second increase of 0.25% which came, as expected, in December 2016 to a range of 0.50% to 0.75%. Overall, despite some data setbacks, the US is still, probably, the best positioned of the major world economies to make solid progress towards a combination of strong growth, full employment and rising inflation: this is going to require the central bank to take action to raise rates so as to make progress towards normalisation of monetary policy, albeit at lower central rates than prevailed before the 2008 crisis. The Fed. therefore also indicated that it expected three further increases of 0.25% in 2017 to deal with rising inflationary pressures.

The result of the **presidential election** in November is expected to lead to a strengthening of US growth if Trump's election promise of a major increase in expenditure on infrastructure is implemented. This policy is also likely to strengthen inflation pressures as the economy is already working at near full capacity. In addition, the unemployment rate is at a low point verging on what is normally classified as being full employment. However, the US does have a substantial amount of hidden unemployment in terms of an unusually large, (for a developed economy), percentage of the working population not actively seeking employment.

Trump's election has had a profound effect on the **bond market and bond yields** rose sharply in the week after his election. Time will tell if this is a reasonable assessment of his election promises to cut taxes at the same time as boosting expenditure. This could lead to a sharp rise in total debt issuance from the current level of around 72% of GDP towards 100% during his term in office. However, although the Republicans now have a monopoly of power for the first time since the 1920s, in having a President and a majority in both Congress and the Senate, there is by no means any certainty that the politicians and advisers he has been appointing to his team, and both houses, will implement the more extreme policies that Trump outlined during his election campaign. Indeed, Trump may even rein back on some of those policies himself.

In the first week since the US election, there was a major shift in **investor sentiment** away from bonds to equities, especially in the US. However, gilt yields in the UK and bond yields in the EU have also been dragged higher. Some commentators are saying that this rise has been an overreaction to the US election result which could be reversed. Other commentators take the view that this could well be the start of the long expected eventual unwinding of bond prices propelled upwards to unrealistically high levels, (and conversely bond yields pushed down), by the artificial and temporary power of quantitative easing.

EZ. In the Eurozone, the ECB commenced, in March 2015, its massive €1.1 trillion programme of quantitative easing to buy high credit quality government and other debt of selected EZ countries at a rate of €60bn per month. This was intended to run initially to September 2016 but was extended to March 2017 at its December 2015 meeting. At its December and March 2016 meetings it progressively cut its deposit facility rate to reach -0.4% and its main refinancing rate from 0.05% to zero. At its March meeting, it also increased its monthly asset purchases to €80bn. These measures have struggled to make a significant impact in boosting economic growth and in helping inflation to rise significantly from low levels towards the target of 2%. Consequently, at its December meeting it extended its asset purchases programme by continuing purchases at the current monthly pace of €80 billion until the end of March 2017, but then continuing at a pace of €60 billion until the end of December 2017, or beyond, if necessary, and in any case until the Governing Council sees a sustained adjustment in the path of inflation consistent with its inflation aim. It also stated that if, in the meantime, the outlook were to become less favourable or if financial conditions became inconsistent with further progress towards a sustained adjustment of the path of inflation, the Governing Council intended to increase the programme in terms of size and/or duration.

EZ GDP growth in the first three quarters of 2016 has been 0.5%, +0.3% and +0.3%, (+1.7% y/y). Forward indications are that economic growth in the EU is likely to continue at moderate levels. This has added to comments from many forecasters that those central banks in countries around the world which are currently struggling to combat low growth, are running out of ammunition to stimulate growth and to boost inflation. Central banks have also been stressing that national governments will need to do more by way of structural reforms, fiscal measures and direct investment expenditure to support demand and economic growth in their economies.

There are also significant specific political and other risks within the EZ: -

- Greece continues to cause major stress in the EU due to its tardiness and reluctance in implementing key reforms required by the EU to make the country more efficient and to make significant progress towards the country being able to pay its way – and before the EU is prepared to agree to release further bail out funds.
- **Spain** has had two inconclusive general elections in 2015 and 2016, both of which failed to produce a workable government with a majority of the 350 seats. At the eleventh hour on 31 October, before it would have become compulsory to call a third general election, the party with the biggest bloc of seats (137), was given a majority confidence vote to form a government. This is potentially a highly unstable situation, particularly given the need to deal with an EU demand for implementation of a package of austerity cuts which will be highly unpopular.
- The under capitalisation of Italian banks poses a major risk. Some German banks are also undercapitalised, especially Deutsche Bank, which is under threat of major financial penalties from regulatory authorities that will further weaken its capitalisation. What is clear is that national governments are forbidden by EU rules from providing state aid to bail out those banks that are at risk, while, at the same time, those banks are unable realistically to borrow additional capital in financial markets due to their vulnerable financial state. However, they are also 'too big, and too important to their national economies, to be allowed to fail'.
- 4 December Italian constitutional referendum on reforming the Senate and reducing its powers; this was also a confidence vote on Prime Minister Renzi who has resigned on losing the referendum. However, there has been remarkably little fall out from this result which probably indicates that the financial markets had already fully priced it in. A rejection of these proposals is likely to

inhibit significant progress in the near future to fundamental political and economic reform which is urgently needed to deal with Italy's core problems, especially low growth and a very high debt to GDP ratio of 135%. These reforms were also intended to give Italy more stable government as no western European country has had such a multiplicity of governments since the Second World War as Italy, due to the equal split of power between the two chambers of the Parliament which are both voted in by the Italian electorate but by using different voting systems. It is currently unclear what the political, and other, repercussions are from this result.

- Dutch general election 15.3.17; a far right party is currently polling neck and neck with the incumbent ruling party. In addition, anti-big business and anti-EU activists have already collected two thirds of the 300,000 signatures required to force a referendum to be taken on approving the EU Canada free trade pact. This could delay the pact until a referendum in 2018 which would require unanimous approval by all EU governments before it can be finalised. In April 2016, Dutch voters rejected by 61.1% an EU Ukraine cooperation pact under the same referendum law. Dutch activists are concerned by the lack of democracy in the institutions of the EU.
- French presidential election; first round 13 April; second round 7 May 2017.
- French National Assembly election June 2017.
- **German Federal election August 22 October 2017.** This could be affected by significant shifts in voter intentions as a result of terrorist attacks, dealing with a huge influx of immigrants and a rise in anti EU sentiment.
- The core EU, (note, not just the Eurozone currency area), principle of free
 movement of people within the EU is a growing issue leading to major stress
 and tension between EU states, especially with the Visegrad bloc of former
 communist states.

Given the number and type of challenges the EU faces in the next eighteen months, there is an identifiable risk for the EU project to be called into fundamental question. The risk of an electoral revolt against the EU establishment has gained traction after the shock results of the UK referendum and the US Presidential election. But it remains to be seen whether any shift in sentiment will gain sufficient traction to produce any further shocks within the EU.

Asia. Economic growth in China has been slowing down and this, in turn, has been denting economic growth in emerging market countries dependent on exporting raw materials to China. Medium term risks have been increasing in China e.g. a dangerous build up in the level of credit compared to the size of GDP, plus there is a need to address a major over supply of housing and surplus industrial capacity, which both need to be eliminated. This needs to be combined with a rebalancing of the economy from investment expenditure to consumer spending. However, the central bank has a track record of supporting growth through various monetary policy measures, though these further stimulate the growth of credit risks and so increase the existing major imbalances within the economy.

Economic growth in **Japan** is still patchy, at best, and skirting with deflation, despite successive rounds of huge monetary stimulus and massive fiscal action to promote consumer spending. The government is also making little progress on fundamental reforms of the economy.

Emerging countries. There have been major concerns around the vulnerability of some emerging countries exposed to the downturn in demand for commodities from China or to competition from the increase in supply of American shale oil and gas reaching world markets. The ending of sanctions on Iran has also brought a further significant increase in oil supplies into the world markets. While these concerns have subsided during 2016, if

interest rates in the USA do rise substantially over the next few years, (and this could also be accompanied by a rise in the value of the dollar in exchange markets), this could cause significant problems for those emerging countries with large amounts of debt denominated in dollars. The Bank of International Settlements has recently released a report that \$340bn of emerging market corporate debt will fall due for repayment in the final two months of 2016 and in 2017 – a 40% increase on the figure for the last three years.

Financial markets could also be vulnerable to risks from those emerging countries with major sovereign wealth funds, that are highly exposed to the falls in commodity prices from the levels prevailing before 2015, especially oil, and which, therefore, may have to liquidate substantial amounts of investments in order to cover national budget deficits over the next few years if the price of oil does not return to pre-2015 levels.

Brexit timetable and process

- March 2017: UK government notifies the European Council of its intention to leave under the Treaty on European Union Article 50
- March 2019: two-year negotiation period on the terms of exit. This period can be extended with the agreement of all members i.e. not that likely.
- UK continues as an EU member during this two-year period with access to the single market and tariff free trade between the EU and UK.
- The UK and EU would attempt to negotiate, among other agreements, a bi-lateral trade agreement over that period.
- The UK would aim for a negotiated agreed withdrawal from the EU, although the UK may also exit without any such agreements.
- If the UK exits without an agreed deal with the EU, World Trade Organisation rules and tariffs could apply to trade between the UK and EU but this is not certain.
- On exit from the EU: the UK parliament would repeal the 1972 European Communities Act.
- The UK will then no longer participate in matters reserved for EU members, such as changes to the EU's budget, voting allocations and policies.
- It is possible that some sort of agreement could be reached for a transitional time period for actually implementing Brexit after March 2019 so as to help exporters to adjust in both the EU and in the UK.

APPENDIX 3: Treasury Management Practice (TMP1) – Credit and Counterparty Risk Management

SPECIFIED INVESTMENTS: All such investments will be sterling denominated, with **maturities up to maximum of 1 year**, meeting the minimum 'high' quality criteria where applicable.

NON-SPECIFIED INVESTMENTS: These are any investments which do not meet the specified investment criteria. A maximum of 70% will be held in aggregate in non-specified investment

A variety of investment instruments will be used, subject to the credit quality of the institution, and depending on the type of investment made it will fall into one of the above categories.

The criteria, time limits and monetary limits applying to institutions or investment vehicles are:

| Specified investments | Minimum credit criteria / colour band | £ limit per institution | Max. maturity period |
|---|---|------------------------------|----------------------|
| DMADF – UK Government | N/A | unlimited | 6 months |
| UK Government gilts | UK sovereign rating | unlimited | 1 year |
| UK Government Treasury bills | UK sovereign rating | unlimited | 1 year |
| Bonds issued by multilateral development banks | UK sovereign rating | unlimited | 1 year |
| Money market funds | AAA | £15m | Liquid |
| Enhanced money market funds with a credit score of 1.25 | AAA | £10m | Liquid |
| Enhanced money market funds with a credit score of 1.5 | AAA | £10m | Liquid |
| Local authorities | N/A | £15m | 1 year |
| CDs or term deposits with banks and building societies | Yellow Purple Blue Orange | £15m £15m £15m £10m | 1 year |

| Non-specified investments | Minimum credit criteria / colour band | £ limit per institution | Max. maturity period |
|---|---|---|---|
| UK Government gilts | UK sovereign rating | unlimited | 5 years |
| Bonds issued by multilateral development banks | UK sovereign rating | unlimited | 5 years |
| Money market funds | AAA | £15m | Liquid |
| Enhanced money market funds with a credit score of 1.25 | AAA | £10m | Liquid |
| Enhanced money market funds with a credit score of 1.5 | AAA | £10m | Liquid |
| Local authorities | N/A | £15m | 5 years |
| Housing Associations | AA- | £2m | 1 year |
| CDs or Term deposits with banks and building societies | Yellow Purple Blue Orange Red Green No Colour | unlimited £15m £15m £10m £10m £10m | Up to 5 years Up to 2 years Up to 1 year Up to 1 year Up to 6 Months Up to 100 days Not for use |
| Corporate bonds | AA- A- | £5m £2m | 1 year |
| Repurchase agreements | AA | £5m | 5 years |

APPENDIX 4: Approved countries for investments

This list is based on those countries which have sovereign ratings of AA- or higher and also have banks operating in sterling markets which have credit ratings of green or above in the Capita Asset Services credit worthiness service.

AAA

- Australia
- Canada
- Denmark
- Germany
- Luxembourg
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland

AA+

- Finland
- Hong Kong
- U.S.A.

AA

- Abu Dhabi (UAE)
- France
- Qatar
- U.K.
